SUMMARY

As a highly qualified mechanical engineering post-graduate with a PhD and an MBA in human resource and financial management, I bring over 11 years of experience in the core hydroelectricity generation sector. My expertise includes extensive exposure to data related to this field, including creating energy accounts and preparing data banks on Excel sheets to track various operating parameters.

Currently, I am further enhancing my technical skills by mastering Python, SQL, Power BI, machine-learning, and other data analytics & data science software. With a strong aptitude for mathematics and statistics, I am well-equipped to excel in roles in data science and data analytics, leveraging my rich industry experience and continuous learning mindset.
